(detergent) --.

IN THE CLAIMS:

B¹ 1. (twice amended) A composition free of whole *Eimeria* parasites, which comprises one or more proteins, or fragments [or variants] thereof, wherein said proteins:

(a) are present in the hydrophilic phase of a Triton X-114 extract of *Eimeria* sporozoites; and

(b) have molecular masses of 26-30 kDa \pm 5 kDa when determined by SDS-PAGE under reducing conditions.

B² 3. (twice amended) A composition according to claim 1, wherein at least 50% w/w of proteinaceous material present is made up of one or more of said proteins[,] and/or fragments [and/or variants].

4. (twice amended) A composition according to claim 1, wherein a plurality of said proteins[, or] and/or fragments [or variants] thereof[,] are present.

B³ 5. (twice amended) A composition according to claim 1, wherein only one of said proteins[,] or fragments [or variants] thereof[,] is present.

6. (twice amended) An isolated nucleic acid molecule, which:

a) encodes a protein, [or variant] or fragment thereof, as described in claim 1,

b) is complementary to a nucleic acid molecule as described in a), or

c) hybridises to a nucleic acid molecule as described in a) or b).
